

Highprofile AVENIR

INTRODUCING THE
FUTURE IN SHUTTERS

MAXIMISE LIGHT & VIEW
WITH EXTRA WIDE PANELS

Highprofile
AVENIR

Highprofile Avenir is the future of plantation shutters, combining ingenuity, innovation and style. Made from aluminium, it is the most durable shutter in the industry. It offers the widest single panel expanse of any interior shutter - maximising both light and view. With clean modern lines and finished with a matt powder coat, this shutter has all the benefits of a premium shutter but at a fraction of the price.

WHY CHOOSE AN ALUMINIUM SHUTTER FOR INDOORS?

Maximum Light & View

Highprofile Avenir has the largest single panel expanse reaching up to 1100mm wide, without compromising any of the structural integrity of the shutter.

Strong & Durable

Aluminium is inherently stronger and more durable than timber and PVC, making Highprofile Avenir the ultimate choice for withstanding the wear and tear of everyday living.

Energy Efficient

Windows are typically responsible for losing 25%-50% of the energy used to heat and cool a home. Highprofile Avenir aluminium shutters will help reduce your home's energy consumption by offering UV protection and heat reflection during summer months and acting as an insulator and chill barrier in the winter.

Tight Louvre Closure

Each louvre is precisely extruded from aluminium, giving the shutters a tight louvre closure, minimising light when required.

Superior Finish

The matt powder coat finish is highly durable, VOC free and is very resistant to scratches and blemishes.

Perfect For The Entire House

Highprofile Avenir aluminium shutters are available in a wide range of applications, and are suitable for any space within the home including high use and wet areas.

Contact one of our sales representatives today to find out how **Highprofile Avenir** aluminium shutters can take your home to a whole new level of style.
