# Highprofile

## WARRANTY

The Highprofile Classic timber plantation shutter collection will take your home to a whole new level of style, transforming the way you live. Highprofile Classic shutters combine strength and durability with elegant design, and help you provide the right mix of light, airflow and temperature control in that special space.

*Our unique construction method means you can place less panels in a window and maximise both light and the view.*

Choose between our three beautiful and versatile options of poplar painted, paulownia painted or basswood stained.

### HIGHPROFILE CLASSIC PAINT

Our Highprofile Classic painted shutters are the perfect choice for that classic plantation look which shines in both traditional and modern settings. Opt for one of our on-trend standard whites, or experiment with custom colours to create your ideal interior scheme. Choose from two types of 100% premium hardwood timber - poplar or paulownia. Both options are low-density light-coloured hardwood and possess a fine texture, offering a flawless finish.

Our unique construction method makes our shutters stronger but also results in a more efficient yield from the tree, resulting in a more environmentally friendly and economical finished product.

### HIGHPROFILE CLASSIC STAIN

For that truly luxurious feel, a beautiful shutter in a rich timber stain is without equal. Made from premium basswood, our timber is light in colour, has a fine uniform texture and an indistinct straight grain, which enhances the stain colouring process. Available in a number of standard stain finishes and custom stains upon request, your shutters will complement any space imaginable.

Furthermore, our unique production process means that our Highprofile Classic stain shutters can span the largest single solid panel distances in the industry.

*Talk to your sales representative about the various colours, stains, blade sizes and installation methods available.*

# THE RIGHT CHOICE FOR THE ENVIRONMENT

## Organic and Renewable

Timber is reusable, recyclable and biodegradable. In comparison, inorganic materials not only require excessive energy to produce, but are non-recyclable and typically release toxic chemicals. Timber is a renewable resource and costs the environment less compared to other products.

## Energy Efficient

Did you know that windows are typically responsible for losing 25%-50% of the energy used to heat and cool a home? Highprofile Classic timber plantation shutters will help reduce your home's energy consumption by offering UV protection and heat reflection during summer months and acting as an insulator and chill barrier in the winter.

**Contact one of our sales representatives today to find out how Highprofile Classic timber plantation shutters can take your home to a whole new level of style and transform the way you live.**
